WASHINGTON
The Honey Sweet Strawberry

J. N. Rokely & Son
Bridgman, Michigan

TO OUR CUSTOMERS

We take pleasure in presenting this, our 22nd Annual Catalog, to you. It is sent you from an earnest desire to help make your fruit growing more profitable. Every word in this catalog is written by ourselves and we have endeavored to have every word and every illustration in it absolutely true, carefully avoiding exaggeration and painting of extravagant word pictures to attract attention.

J. N. Rokely

For the past forty-four years Rokely's have been successfully growing and selling nursery stock here at Bridgman. We have enjoyed a prosperous and steady growth from year to year, not due to bombastic advertising and impossible promises, but to an honest conservatism and absolutely fair treatment of all customers. Forty-four years of successful growing and selling proves both our honesty and the high quality of our stock. Our plants must have been money makers and our methods of dealing must have been honest; otherwise we would either be today a very small and unreliable con-

A. J. Rokely

cern, or else we would long since have been out of business entirely. Our present prosperity is due entirely to the fact that year after year we have produced and sold stronger, more productive and more profitable nursery stock than ever before. This is your assurance that your order with us will bring you good, healthy, true-to-name stock.

Berrien County, Michigan, where we are located, is first in the United States in the yearly number of strawberry plants grown and shipped. The reason is not far to seek. Natural conditions here are almost perfect. The soil is ideal—deep, rich and loose. The climate is tempered by Lake Michigan, and very equable. An abundant rain-fall makes possible enormous yields. It is in such environments that our Nursery Stock is grown and nowhere can better stock be produced. In fact the enormous root systems of our plants are a surprise and delight to those who receive them for the first time. Such stock cannot help but grow if given proper care.

Our aim has always been, and always will be, to produce the best possible stock and sell at the lowest possible prices. Our long experience has taught us the best and cheapest methods of growing stock and our common sense advertising helps cut our overhead expense to a point where we can afford to sell our stock at reasonable prices. We do not claim to sell our stock cheaper than any other nursery in the country, but we do claim our prices to be as low as possible for quality stock. During our twenty-two years of selling direct by mail our prices have been consistently lower than those of any other nursery of our size and reputation in this section of the country.

Furthermore, we both live here on the farm and are actively engaged in this business. Every order receives our personal attention both in office and packing house and in case of error or complaint we are here ready and glad to make adjustment to your complete satisfaction if we are in any way at fault.

We thank all our old customers for their most liberal patronage during the past year. To the many who are receiving our catalog for the first time this season, we hope you will decide to favor us with your orders. We know we can please you and save you money and will surely welcome a chance to prove it.

Very truly yours,

J. N. ROKELY & SON.

OUR GUARANTEE

We guarantee all nursery stock sold by us to be first class, true to name, and free from injurious disease. We further guarantee safe arrival of your order by express or parcel post. All complaints of any nature, except untruthness to name, must be made within five days after receipt of shipment. However, it is mutually agreed between ourselves and purchaser that we are in no case to be held responsible for more than the original purchase price of the stock.

We wish it fully understood that we do not guarantee continued growth of any nursery stock sold by us. The welfare of plants, trees, shrubs, etc., is entirely dependent upon care, weather conditions, and other matters entirely beyond our control. Our liability, except as above noted, ends upon delivery of good live stock—the rest is up to you.

STRAWBERRIES

Early Varieties

BEAVER

A new Strawberry recently originated in Wisconsin by C. H. Beaver, and one that is rapidly taking its place among the leading kinds. It is a cross between Dr. Burrill and Premier, retaining all the valuable fruiting features of the Premier and in addition, like Dr. Burrill, makes new runners freely.

Beaver is a perfect blossom plant, with dark green foliage, very strong and vigorous, good runner maker and drought resister. The berries are of a deep glossy red which extends over the entire berry to the heart of the fruit. Is very productive, hardy and firm and of such texture that it does not require picking more than twice a week. While we class the Beaver as an early variety, it extends over such a long period of time that it may also be classed among the late varieties. Rich, mild flavor, high color and firmness are some of its superior qualities, and predictions are that within a short time it will be the leading canning berry. In addition it is unsurpassed as a shipper. Leading growers are setting large acreage to Beaver, as its ability to stand up under extreme conditions, rich color, size and attractive appearance command the highest price.

We recommend this berry highly to commercial growers especially where soil is poor or late frosts usually injure blossoms.

BLAKEMORE

The Blakemore is a new variety originated and developed by the U. S. Department of Agriculture. It is a cross of Missionary and Premier and has been thoroughly tested, tried and subjected to all kinds of trials before being introduced.

The Blakemore is extra early, ripening same time as Beaver, and four to five days before Premier. Berries are bright red and resemble Premier, although they are somewhat larger and of better color. Because of its firm flesh and tough skin the Blakemore has proven a good long distance shipper and will remain on the vines a considerable time after ripe without loss from over-ripeness or rotting. Blakemore is a vigorous grower, and runners are produced freely, with foliage quite resistant to leaf spot. Perfect flowering.

We still consider Premier the best early berry in existence for all around worth. However, where extremely long distance shipments are to be made, or where some condition of your soil or locality does not suit Premier, or where weather and lack of help prevent keeping Premier picked up closely, then by all means try Blakemore.

Beaver

RED GOLD

Introduced by Gardner Nursery Company of Iowa, this new early variety has gained rapidly in popularity. The berries are enormous in size, shining red in color, and the sweetest we have ever tasted. Does not contain the acid found in other kinds so requires much less sugar for preserving. Many report using only one-half the usual amount. A heavy bloomer and sets a large crop of fruit. Plants are healthy and vigorous and make new runners freely, greatly resembling the Senator Dunlap in this respect. Foliage is dark green, leaves round, and fruit stems strong and erect. We consider this variety especially valuable for the home garden and urge everyone to give it a trial.

Red Gold

PREMIER

This variety is now almost too well known to require a description. The exceptionally satisfactory and usually profitable crops secured from Premier have made it first choice among all successful strawberry growers throughout the country who know and demand the best, and who have found from their own experience that Premier will produce more dollars per acre, with a bigger crop certainty, than any other variety offered today. Premier is the earliest worthwhile strawberry of the older varieties. This feature alone makes it a great money maker, for it yields its fruit crop at a time when strawberries are in great de-

mand and buyers everywhere are willing and anxious to snap up every available quart of Premier paying the highest price for this fancy, early fruit.

The vines bear an enormous crop of large, uniform sized berries, while the berry is bright red clear to the center, is perfect in shape, and ripens without green tips. The fruit presents a very pleasing appearance on the market and possesses a flavor equal to the later varieties, which is very unusual in an early berry. The plants are sturdy, healthy, and long rooted, making them drought resistant. The foliage is a beautiful dark green and very abundant.

Plants I received last week were just fine. 4-20-32. W. P. Gallapo, Marion, Ind.

Premier

SPECIAL PRICES

If you are going to plant a large number of plants, trees, shrubs, etc., send us a list of the stock you need and we will promptly quote you our best price.

Large orders can be handled at a saving and we will pass this saving on to you.

Midseason Varieties

COOPER

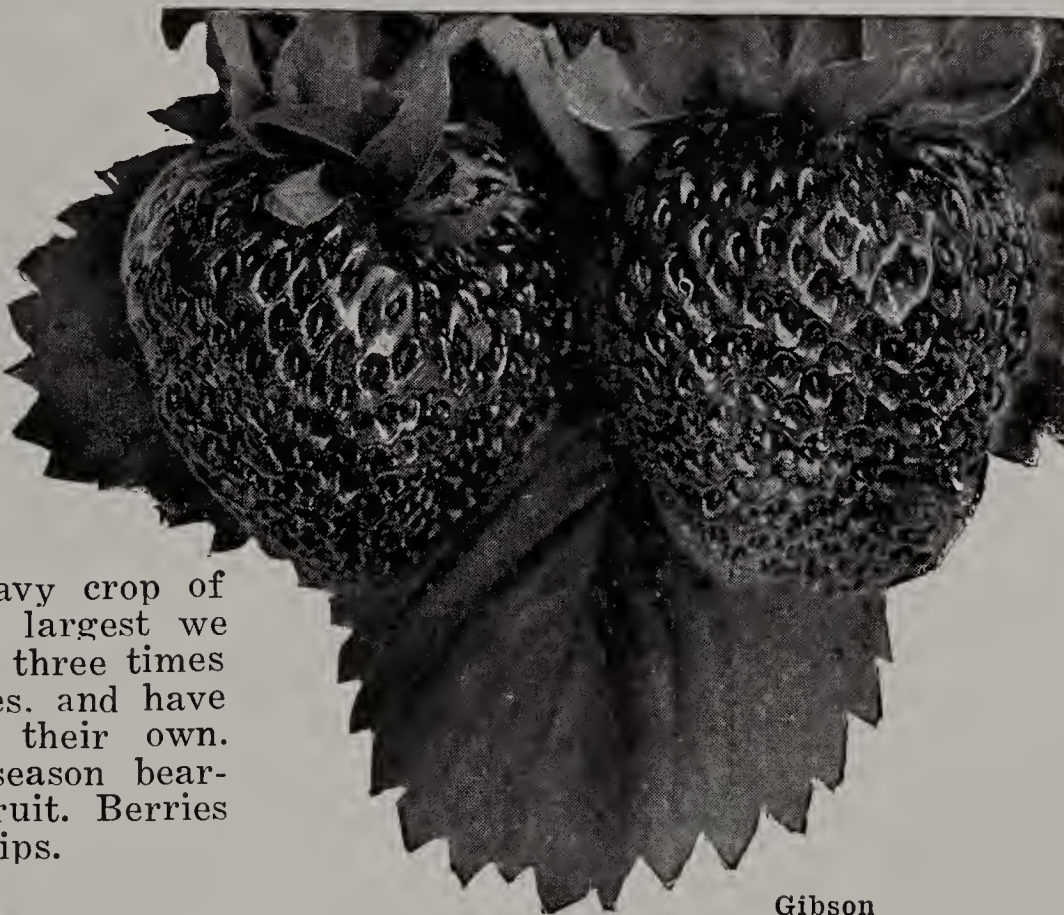

Cooper is especially adapted to fancy, local market trade, where its large size and attractive appearance result in quick sales at big prices. This variety makes a wonderful thrifty growth of foliage, the plants standing erect and presenting a beautiful appearance on account of their great size. The fruit stems, which are protected by the foliage, are very stocky and erect and set an exceptionally heavy crop of berries. The berries are the largest we have ever seen, being two or three times as large as ordinary varieties, and have a rich, luscious flavor all their own. Commence ripening in mid-season bearing an enormous crop of fruit. Berries ripen evenly without green tips.

DR. BURRILL

This variety was originated by Dr. Reasoner, of Urbana, Ill., who also originated the famous Senator Dunlap. It is claimed that Dr. Burrill is the result of a scientific cross between Crescent and Senator Dunlap. However, we have been observing this variety closely since its introduction and find that the difference between Dr. Burrill and Senator Dunlap is so slight, if any, that we are safe in calling them one and the same variety. We have kept our original strain of Dr. Burrill pure and can furnish plants from this strain if desired.

Harvest King

Gibson

GIBSON

An unusually safe variety for commercial planting, inasmuch as it always produces a big crop of large marketable berries, seeming to thrive equally well in all sorts of soils and climates. This is a feature hard to find in strawberries, and one that makes a variety especially valuable. The berries are large, holding their size to the end of the season, and are all that could be asked for in color, flavor, firmness and productiveness. The plants are long rooted and will withstand much dry weather. Foliage very rank, affording protection for blossoms and fruit, and is dark green in color. Fruit stems large and strong. Plants propagate freely and will make nice, heavy, picking rows. Gibson is not only an ideal market berry, but one that is especially good for canning and commercial planting.

HARVEST KING

Harvest King is a berry originated in Northern Michigan. An exceptional plant maker and a variety which, if not allowed to make too many plants, is a wonder.

Harvest King blossoms late, thereby protecting itself from late spring frosts, and then matures its fruit so rapidly that it ripens with Gibson, Senator Dunlap, and other midseason varieties. The berries are very similar to Premier in size, color, shape and quality. A heavy bearer. Flavor is excellent and especially fine for canning. Good shipper. Foliage is abundant and healthy. Fruit stems are semi-rigid, holding fruit well off the ground when fully ripened. Our stock is genuine Harvest King and guaranteed to be absolutely true to name.

SENATOR DUNLAP

An old standard variety that has been widely grown in the middle and northern states for many years. It produces wonderfully large crops of handsome dark red berries of the highest quality. The plants are medium in size, hardy, long rooted, very prolific, and will hold their own under most any rough and tumble methods of cultivation. If allowed to grow unrestricted they will cover the ground with a mat of vines but for best results they should be kept down to a good sized fruiting row. Both the canning factory and the housewife demand this grand old variety on account of its splendid flavor and dark, rich, beautiful color.

Pearl

Late Varieties

AROMA

A good late variety long considered the standard late market Strawberry. It is still grown extensively in all sections of the country, but is especially popular in the Southern States. It produces a quan-

Aroma

tity of large berries, uniformly round in shape and deep glossy red in color. The plant is a hardy grower in any climate, producing healthy, dark green foliage. The berry has a pleasing aromatic flavor peculiar to this variety alone. It is a fancy berry and brings top market anywhere. On account of its exceptional firmness it is an ideal long distance shipper.

PEARL

Undoubtedly the latest June variety. In the north it does not come into its prime until the very last of June and early July. The fruit is large in size, dark red to the center, firm, and a good shipper. The prominent yellow seeds add to its attractive appearance. Flavor is excellent and is a heavy and sure cropper. When Pearl is at its best the other varieties are off the market so you cannot go wrong in adding Pearl to your list for an extra late berry.

WASHINGTON

Washington is a very late perfect blossom variety. Bears immense loads of fruit on stems well off the ground, is a fine plant maker, with heavy foliage, large glossy leaves of high luster. Deep glossy red berries, very large in size, have the most delicious flavor of any Strawberry. Very juicy and requires almost no sugar. Very firm, and will stand for days without softening and present an excellent appearance. This variety was introduced here in Michigan and we strongly urge all growers to give it a trial.

If you have friends whom you think would like a copy of our catalog you will be doing them and us both a kindness by sending us their names and addresses.

Mastodon— Everbearing Strawberry

Ever since the introduction of the first everbearing varieties, years ago, growers have been waiting for a commercial everbearing strawberry that has size, flavor, productiveness and shipping qualities. The Mastodon has all of these qualities, and more. The plant, unlike other Everbearers, is big, thrifty, with an ideal root system that enables it to produce its enormous crop of fine large berries even under trying conditions. The Mastodon is the largest, and heaviest yielding everbearing strawberry yet introduced.

Mastodon berries are the largest of any known Everbearer. Not just a few, but all the berries, are fully twice the size of the average Everbearer. Neither do they become small during the latter part of the bearing season but retain their large size to the last berries. Berries are glossy red in color and with bright yellow seeds present a beautiful appearance. Flavor is rich and good. The Mastodon plant is large and bushy with a thrifty foliage that protects the berries from hot suns as well as fall frosts. The most prolific plant maker of the Everbearers.

Planted in early spring, the Mastodon begins to ripen its fall crop about July 15th and continues through August, September, and October. Not only do they

produce a big money crop the same summer and fall after planting, but another big crop the following spring with other berries. After a rest of about six weeks they will then put out new fruit stems and bear during the fall months. Send in your Mastodon order early and avoid disappointment.

CHAMPION

Until the introduction of the Mastodon. Champion was the leading Everbearer and is still preferred by many for home use as the flavor is rich and pleasing and much less acid than the Mastodon. The Champion bears large quantities of medium sized berries, uniformly conical in shape, and a beautiful dark red to the center.

IMPORTANT

Every variety of Strawberry Plants offered by us in perfect flowering and requires no other kind planted with it for proper pollinization. Any variety will produce fruit just as well when planted alone as when planted with other varieties; although several kinds may be grown together if you prefer.

Mastodon

CHOICE RASPBERRIES

Cumberland, The Most Profitable Blackcap

CUMBERLAND BLACK

THE MOST PROFITABLE BLACKCAP

No blackcap has ever been grown as extensively as Cumberland, nor attained its great popularity in all raspberry producing sections of the country. Cumberland plants are healthy, vigorous growers, throwing up stout, stocky, well branched canes that produce immense crops of wonderful berries—large, a rich black in color, firm and of the highest quality. The Cumberland is less susceptible to disease than other varieties and is extremely hardy, withstanding most severe winters unharmed. If you want a money maker, plant Cumberland—the most profitable blackcap of all time.

RED RASPBERRIES

THE NEW CHIEF RASPBERRY

This new raspberry was originated recently at the Minnesota State Fruit Breeding Farm at Excelsior, Minnesota, and is a selection from 4,000 seedlings of Latham. It has already established itself as a berry filling an important place, as has its illustrious ancestor, the Latham. The fruit, of good size, bright red and firm, ripens about ten days earlier than the Latham and extends over a long period. The quality of the fruit is excellent. On test plots for the past three years, the plant has outyielded all other varieties which were tested in adjoining plots, even outyielding Latham, which, up to the introduction of the Chief, has been our heaviest yielder. The plants are vigorous in growth, perfectly hardy and seem to be almost resistant to mildew and mosaic. The wood ripens early and is a good plant maker. Chief has the good qualities looked for in a raspberry; earliness, hardiness, quality of fruit, and yield.

CUTHBERT

THE RICHEST FLAVORED RED

A well-known leading late variety all over the country. The canes are very thrifty growers, upright in shape, light yellow in color. Fruit is dark red, large, oblong in shape, and firm enough to stand shipping in pint boxes. Very productive. However, it is the flavor of the Cuthbert that gives it distinction. It is sweet, rich, and luscious and surpasses all others for home use and canning. A great market sort and will stand shipping well. Adapted to both north and south.

EARLY KING

THE EARLY MARKET RED

We recommend this variety as one of the best early red raspberries grown. It is extremely early and enormously pro-

Early King

ductive of large, firm, bright red berries. The berries are very attractive in appearance, easy to pick, and unlike other varieties, will not turn dark if allowed to become over ripe. They are excellent shippers and will bring top market price. The canes are hardy and thrifty. The Early King is the leading early market Red in all parts of the country as it is well adapted to all soils and climatic conditions.

Latham

LATHAM

THE COUNTRY'S BEST LATE RED

An outstanding variety of Red Raspberry originated by The Minnesota State Fruit Breeding Farm and now firmly established as the best late red variety grown. It has proven enormously productive in a commercial way, yielding one-half again as many quarts per acre as Cuthbert, with which it ripens. Quality of first rank. Excellent for shipping and home use. The giant, bright red berries are decidedly attractive and command higher prices than others in the same market. It is a strong grower; canes are tall and extra heavy with dark green foliage. Having originated in Minnesota, it naturally is extremely hardy and can be planted with success assured. Our plants are strong and free from disease.

The Raspberry plants came in fine shape and they are certainly fine big plants. 4-22-32. James Hutchins, Mt. Pleasant, Mich.

TRANSPLANTS

This season we are offering 2 yr. No. 1 (or Transplant) stock in some varieties of Raspberries. These are healthy one-year plants that were lined out in our nursery last spring and allowed to grow another season. These plants are now large heavy two-year stock and will produce many berries this coming summer if not cut back when planted. However, we advise close pruning when planting out this stock for commercial purposes.

The Peach Trees I purchased of you are in bearing and you certainly have been honest in sending me good stuff and true to name. 1-12-32. D. B. Smith, Tiffin, Ohio.

This makes the third time we have ordered from you and everything has grown and done fine. We are very well pleased with your nursery goods and always let visitors know where we got them. 3-3-32. O. J. Smith, Coggon, Ia.

The Raspberry Plants arrived and they sure look mighty fine. 4-5-32. Reo Johnson, Columbia City, Ind.

The New Chief Raspberry

ELDORADO BLACKBERRIES

THE GREATEST BLACKBERRY UNDER CULTIVATION

Eldorado Blackberry

This is the finest blackberry grown. Its large size and delicious quality put it far in advance of other standard varieties. It is the hardiest blackberry under cultivation and will withstand the northern climate uninjured. It is very productive and has not failed to ripen a crop since its introduction, so we have confidence in recommending it as far superior to anything we know of on the market. It has been cultivated twenty years and under careful tests at the experiment station has never winter killed or failed to produce a full crop of the finest fruit. The canes are very vigorous and hardy, enduring the winter of the far northwest without injury, and their yield of fruit is enormous. The berries are large, jet black, borne in large clusters and ripen well together. They are large, sweet, melting and pleasing to the taste, have no hard core and keep four to five days after picking with quality unimpaired.

ASPARAGUS

The culture of this early and delicious vegetable is usually very profitable. It comes early in the season when there is little else to market and the proceeds are quite acceptable. It is a rank feeder and must be manured very highly. Plow or spade the ground at least a foot deep, work in and mix thoroughly with the soil, plenty of rich, well-rotted manure. For field culture plant in rows three and one-half to four feet apart and one and one-half in the row. But for home use it may be planted one and one-half feet apart each way and some three inches deep. Keep the ground clear of weeds. Give bed a good coat of rich manure every fall if possible.

Martha Washington

MARTHA WASHINGTON

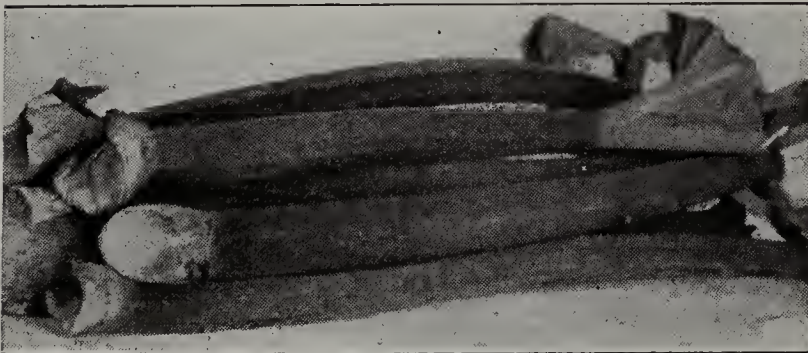

— This variety is the result of careful breeding by the U. S. Department of Agriculture, Washington, D. C. with the object of eliminating rust. It produces large, straight shoots of a dark green color. The tips are tight and firm and do not open out or begin to branch until well out of the ground; a very valuable feature.

I have received the nursery stock and bulbs and I am sure proud of them. They are the finest plants and bulbs I have ever received. 4-7-32. Mrs. Emma Kinsman, Shattuck, Okla.

Rhubarb or Pieplant

Coming on so early, Rhubarb finds a ready market, being relished by everyone. The city garden should have a dozen or more hills and every farm can add to its income by raising Rhubarb. It is easily produced in a commercial way, yields immensely, can be shipped almost any distance, and is easily gathered and packed.

MYATT'S LINNEAUS—Early, just before Asparagus; immense stalks, tender, delicious flavored; productive and continues long in use; the best variety for general use. Large, thrifty roots.

Myatt's Linneaus

NUMBER OF PLANTS PER ACRE

Following we give most common planting distances for berry plants and number of plants required per acre.

	Distance apart	No. plants per acre
Strawberries	4 ft. x 18 in.....	7,000
Red Raspberries	6 ft. x 3 ft.....	2,400
Black Raspberries	7 ft. x 4 ft.....	1,550
Blackberries	8 ft. x 4 ft.....	1,350
Grape Vines	8 ft. x 10 ft.....	550

If you prefer to plant other distances than those listed, here is a simple rule to determine the number of plants required for an acre. Multiply the distance between rows, in feet, by the distance between the plants in the row, in feet. This will give the number of square feet required for one plant. Divide this into 43,560, the number of square feet in an acre, and the result will be the number of plants you will need for one acre of ground.

CHOICE GRAPES

When you plant a vineyard you invest in something permanent. You will receive a regular yearly income from it as long as you live. Practically all the cultivation is done by horse power and very little hand work is required. Returns per acre are high considering the amount of labor required to produce a crop. Grapes are being planted extensively in all sections of the country and an ever expanding market creates a demand far ahead of the supply. Plant a vineyard of our Concord plants this spring and cash in on this opportunity for pleasant, profitable fruit growing.

CAMPBELL'S EARLY—A strikingly handsome, large black early grape with blue bloom. Tough skin and good shipper. Coloring up ten days before ripening, and will hang six weeks on the vine. Flesh sweet though not high flavored, and rather hard and pulpy, but without any inner acidity about the seeds, which are small and few and separate readily from the pulp. Bunches large and compact, often double-shouldered. Must be pruned closely. Inclined to overbear. Excellent commercial sort for northern latitudes.

CATAWBA—A well-known, chocolate-colored grape of a rich musky flavor. A great wine grape; fine for dessert. Bunches large and loose; berries large and coppery red, becoming purplish when well ripened. Ripens soon after Concord.

CONCORD—Still the most popular grape in America, and grown with success in every state in the union. It will adapt itself to almost any condition of soil and climate and is the biggest money maker of grapes. The bunches are large and well filled and berries are large, purplish black, and of excellent quality. Vines are vigorous, hardy, and free from disease.

MOORE'S EARLY—A seedling of the Concord which it resembles. One of the best early black grapes grown. Bunches medium large, inclined to looseness. Berries very large and round. Quality good. Vine vigorous and hardy. Ripens about ten days ahead of Concord.

NIAGARA—A magnificent white grape, valuable for garden and vineyard. Berries large, tough skin; quality very good; beautiful bunches of the largest size. Ripens about with Concord. A rank grower and very productive.

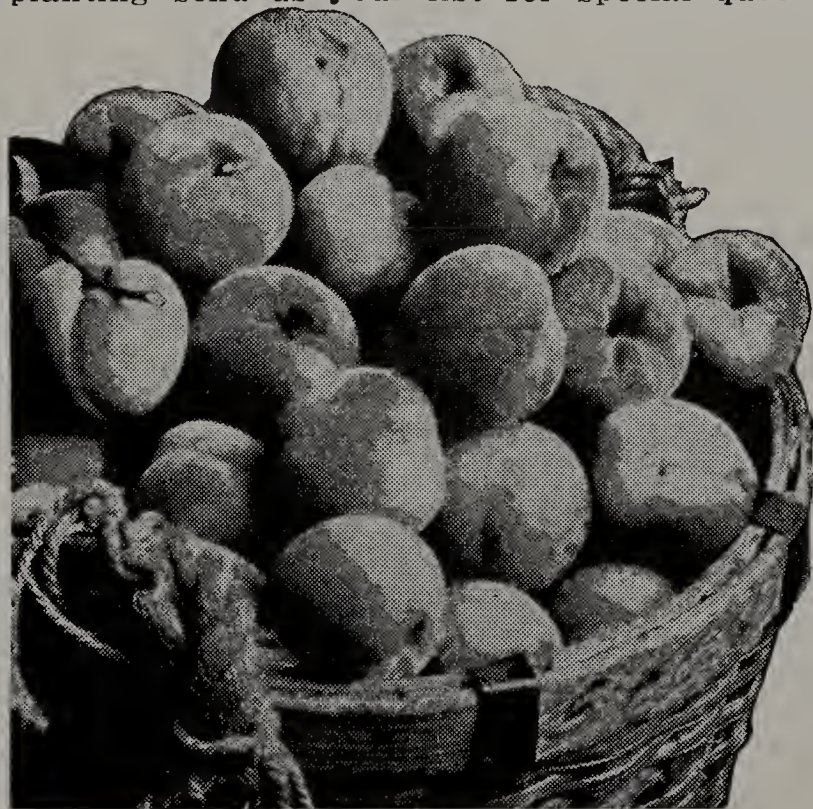

For prices of grape vines, see page 23.

Concord
Grapes

Hardy Northern Grown Fruit Trees

Our fruit trees are all healthy, thrifty stock, and quality and size have not been skimmed to make a low price. We are listing the best and most popular varieties and are in position to furnish in large quantities to commercial growers. If interested in a large planting send us your list for special quotations.

Elberta Peaches

Peaches

PRICE—All varieties, 1 yr. 4 to 6 ft., trees 23c each; 10 for \$2.00; 100 for \$18.00. Express only.

ELBERTA—The standard market peach of the country. Very large, red blush; flesh yellow, tender, and juicy. Rank, vigorous grower. Freestone. Ripens middle of September.

J. H. HALE—Fruit extra large. Ripens about a week earlier than Elberta and averages a third larger in size. Color beautiful golden yellow with deep carmine blush. Flavor is extra fine.

ROCHESTER—First, large, yellow freestone peach to ripen. Fruit sweet, juicy, and of delicious flavor. Excellent market or home use variety.

SOUTH HAVEN—New and very popular. Has all the good qualities of Elberta but ripens two weeks earlier. Very similar to Elberta in every way.

Apples

PRICE—All varieties, 2 yr., 4 to 6 ft. trees, 25c each; 10 for \$2.25; 100 for \$20.00. Express only.

BALDWIN—Winter Apple. Large, roundish, dark red. Juicy, sub-acid. Good flavor, good cooker, good keeper. Tree vigorous and upright.

DELICIOUS—Grand champion of winter apples. Red with pin dots of yellow. Fine grain, crisp, juicy, almost sweet. Good keeper and sells high on any market. Our most popular variety.

JONATHAN—A grand, good winter apple. Bright, solid red. Flesh white, firm, fine, crisp and tender. Good size, smooth, roundish. Excellent eating apple.

GRIMES GOLDEN—Large sized, golden-yellow, winter apple with extra fine flavor and good keeping qualities. Rich sub-acid pear flavor. Bears young.

McINTOSH RED—One of the very best early winter apples. Bright, deep red color. Flesh white, tender, juicy, with a rich, delicious and very distinctive flavor. Trees hardy, vigorous and healthy.

NORTHERN SPY—Large, pale yellow, skin mottled with carmine. Firm, tender, crisp, juicy, sub-acid. Popular everywhere. Good keeper.

STAYMAN'S WINESAP—Dark rich red striped with crimson. Flesh tinged with yellow; firm, crisp, fine grained, very juicy, sub-acid flavor. A good one. Winter variety.

TOLMAN SWEET—Yellow. One of the best sweet winter apples. December to March.

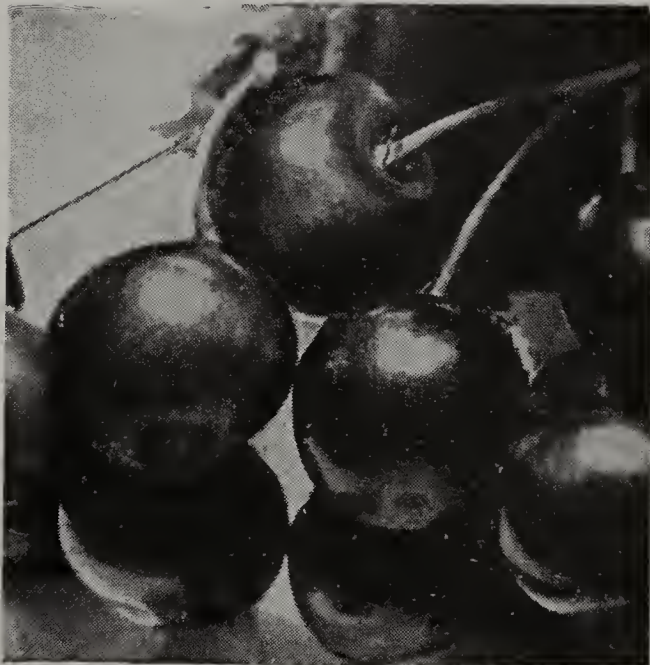

Jonathan Apple

WEALTHY—Ripens late summer and early autumn. Perfectly hardy, vigorous and productive. Fruit large, red streaked with white. Quality excellent.

YELLOW TRANSPARENT—Fruit a clear yellowish-white. Begins to ripen in July. Excellent eating and cooking apple, and best market sort. Bears in 3 to 4 years. The leading summer apple.

HYSLOP CRAB—Best, most widely grown variety. Red, firm, juicy; excellent for home use. Always sells well.

Montmorency Cherry

Cherries

PRICE—**SOUR**: 2 yr. 4 to 6 ft. trees, 25c each; 10 for \$2.25; 100 for \$20.00.

SWEET—2 yr. 4 to 6 ft. trees, 30c each; 10 for \$2.75; 100 for \$25.00. Express only.

EARLY RICHMOND (Sour)—Best early cherry, much like Montmorency, except a little smaller and trifle more acid. A good standard sort. Bright red and juicy. Heavy bearer.

MONTMORENCY (Sour)—Large, late, heavy cropper of dark red cherries. Thick meat and juicy, yet the best shipper known. Its size and flavor as well as general appearance make it the leader everywhere as a main crop cherry.

BLACK TARTARIAN (Sweet)—Very large purplish black, heart shaped; flesh mild and sweet, and quality excellent. Good market sort and we recommend it as the best sweet for home use. Ripens in July.

NAPOLEON (Sweet)—Fruit is very large, oblong, light lemon-yellow with a red cheek. Tree is medium sized and erect. A beautiful and delicious fruit.

Pears

PRICE—All varieties, 2 yr., 4 to 6 ft. trees, 30c each; 10 for \$2.75; 100 for \$25.00. Express only.

BARTLETT—The leading commercial and home use pear. Big producer. Early; golden colored, sometimes with red cheek. Flavor is melting, rich and buttery. Good for any and every use. Ripens about first of September.

KIEFFER—Late fall and winter pear. Tree is hardy and almost entirely disease-resistant. Will grow and produce where other varieties will not survive. Fruit is large, greenish-yellow. Quality not so good as Bartlett but is excellent if properly canned.

CLAPP'S FAVORITE—Ripens early August. A seedling of Bartlett but earlier ripening; somewhat larger; lemon-yellow; of very good eating quality.

SECKEL (Sugar Pear)—Small, very juicy and sweet. Popular for pickling and preserving. Claimed to be the best flavored pear grown.

Kieffer Pear

Plums

PRICE—All varieties, 2 yr. 4 to 6 ft. trees, 30c each; 10 for \$2.75; 100 for \$25.00. Express only.

BRADSHAW—A splendid early. Large, dark violet red. Flesh yellow, juicy, good. Fine for canning.

BURBANK—Fruit large, oval, with reddish purple skin. Heavy yielder and very hardy. Good flavor; more acid than the Bradshaw.

GERMAN PRUNE—Old favorite. Fruit is long, oval, purple with a thick blue bloom. Flesh is firm, sweet and pleasant, separating freely from the stone.

YELLOW EGG—Golden yellow covered with thick bloom. Flesh golden yellow. Rather juicy. Tree large, very productive.

MONARCH—Late, large. Dark purplish blue; perfect freestone. Flesh is pale golden green and juicy. Heavy bearer and begins fruiting young.

Burbank

SIZE OF TREES

Our Fruit Trees are all graded to the standards of the American Association of Nurserymen. Peach are all 1-yr. 9-16 inch caliper, trees, 4 to 6 ft. high. All other trees are 2-yr. 9-16 inch caliper, 4 to 6 ft. high.

Some firms are listing this same grade of tree as a 5 to 6 ft. tree, thus attempting to give the impression that their stock is larger. Do not be misled—buy your trees by caliper. Remember, our trees are all 9-16 inch caliper, and up. This size is too large for parcel post shipment and must be forwarded by express.

HARDY ORNAMENTAL SHRUBS

Our shrubs are all heavy, bushy, transplanted, field-grown stocks. Two and three years old. Please do not confuse them with the cheap 1 year old cutting stock offered by many firms at bargain prices. Quality considered, you will find our prices the lowest in the field.

BARBERRY (Japanese)—Probably the most common and hardiest of hedge plants and also used for grouping in front of taller growing shrubs. It is a dwarf, compact shrub with many small leaves which change to colors, orange-red to bronze in the autumn. Bright red berries are present and remain throughout the winter. 12 to 18 in. 10c each, 3 for 25c, 10 for 75c; 18 to 24 in. 15c each, 3 for 40c, 10 for \$1.10.

BUDDLEIA (Butterfly Bush)—This shrub set out in spring, will mature to full size the first year. A single plant will show, the first season, as many as fifty flower

spikes of beautiful lilac color. Both foliage and blooms very attractive. Perfectly hardy but semi-herbaceous. Large 2 yr. No. 1 bushes, each 20c; 3 for 55c; 10 for \$1.75.

ALTHEA (Rose of Sharon)—This beautiful shrub flowers late in the summer when most others are out of bloom. It bears large, double, flowers similar to the Hollyhock, very abundantly on strong, erect branches. Colors: White, Red, Pink, and Blue, all double. State colors. 2 to 3 ft., each 20c; 3 for 55c; 10 for \$1.75.

BARBERRY (Japanese Red Leaf)—A new and outstanding novelty that is really worth while. It is similar in all respects to the green-leaved Japanese Barberry, but the foliage is of a rich, lustrous, bronzy red. The color will not fade during the summer but becomes more brilliant and gorgeous as the season advances. In the fall its foliage changes to vivid orange, scarlet and red shades, more brilliant and more effective than the ordinary Japanese Barberry. Must be planted in full exposure to the sun to develop full coloring. 9 to 12 in., 10c each, 3 for 25c, 10 for 75c, 100 for \$6.00; 12 to 15 in., 15c each, 3 for 40c, 10 for \$1.10, 100 for \$9.00.

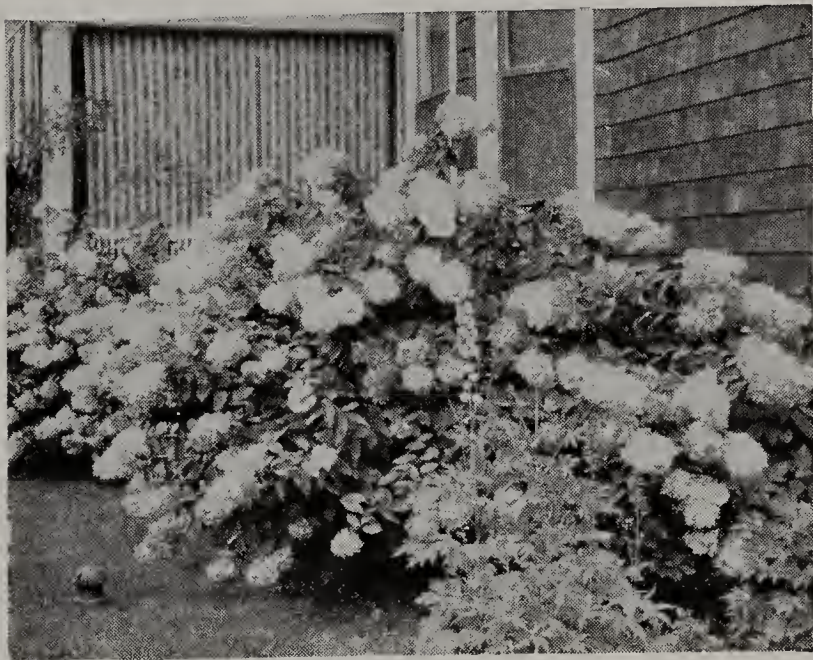

CALYCANTHUS (Sweet Scented Shrub)—A very desirable shrub having rare and peculiar fragrance of wood and flowers. Blooms in June and at intervals through the summer. Flowers chocolate brown in color. 18 to 24 inches, each 25c; 3 for 65c.

CORNUS LUTEI (Yellow branched Dogwood)—Bright yellow bark. Makes an attractive combination with Red branched Dogwood. 18 to 24 inches, each 20c; 3 for 55c; 10 for \$1.75.

Althea (Rose of Sharon)

Don't fail to plant a few shrubs this year.

Hydrangea (P. G.)

CORNUS SIBERICA (Red branched Dogwood)—Has an upright spreading habit and slender bright red branches, which add a touch of color to the shrubbery during the winter. Abundant small white blossoms borne in early summer. 12 to 18 in. each, 10c, 3 for 25c, 10 for 75c; 18 to 24 in., each, 15c, 3 for 40c, 10 for \$1.10.

DEUTZIA GRACILIS—Slender branched variety, dwarf habit and very early flowering. Flowers pure white and very abundant. 15 to 18 inches, each 25c, 3 for 65c, 10 for \$1.90.

DEUTZIA, PRIDE OF ROCHESTER—Flowers double white, back of petals tinged with rose. Flowers in June. Growth vigorous; profuse bloomer. Usually considered the best of the Deutzias. 12 to 18 in. each, 10c, 3 for 25c, 10 for 75c; 18 to 24 in., each 15c, 3 for 40c, 10 for \$1.10.

FLOWERING ALMOND—Early spring flowering shrub whose flowers appear before the leaves. Flowers, double pink, snuggling tight to the twigs. 18 to 24 inches, each 30c, 3 for 80c.

FORSYTHIA INTERMEDIA (Golden Bell)—Beautiful early flowering shrub that produces golden yellow flowers before the leaves appear in the early spring. Profuse bloomer. 12 to 18 in., each, 10c, 3 for 25c, 10 for 75c; 18 to 24 in. each, 15c, 3 for 40c, 10 for \$1.10.

GOLDEN ELDER—Handsome variety with golden yellow foliage, contrasting beautifully with other shrubs. The flowers are white, in flat-topped cymes in early summer. Grows naturally from 10 to 12 feet, but can be pruned into a neat little bush. 18 to 24 inches, each 20c, 3 for 55c, 10 for \$1.75.

HONEYSUCKLE (Tartarian)—The finest and best known of all Bush Honeysuckles. Has upright, somewhat spreading branches and bright green foliage. The bright pink flowers are borne freely in May and June, followed by showy red berries. 18 to 24 inches, each 20c, 3 for 55c, 10 for \$1.75.

HYDRANGEA ARBORESCENS (Hills of Snow)—A pure white summer blooming Hydrangea. Sometimes called Snowball Hydrangea. Pure white flowers are borne in pyramidal panicles 5 to 8 inches in diameter and 8 to 10 inches long. 18 to 24 inches, each 25c, 3 for 65c, 10 for \$2.00.

HYDRANGEA PANICULATA GRANDIFLORA (PeeGee)—Flowers in August and continues until frost, bearing immense panicles of bloom a foot long, white at first, turning to rose pink and bronze in autumn. The most popular of Hydrangeas. 12 to 18 in. each, 15c, 3 for 40c, 10 for \$1.00; 18 to 24 in., each, 23c, 3 for 60c, 10 for \$1.75.

JAPANESE QUINCE—Commonly called Flowering Quince and Fire Bush. A small spreading shrub, with spiny branches. Double crimson flowers in great profusion early in the spring. Foliage a dark glossy green. Bears yellow, pear-shaped fruit. 12 to 18 in. each, 15c, 3 for 40c, 10 for \$1.10; 18 to 24 in., each 25c, 3 for 65c, 10 for \$2.00.

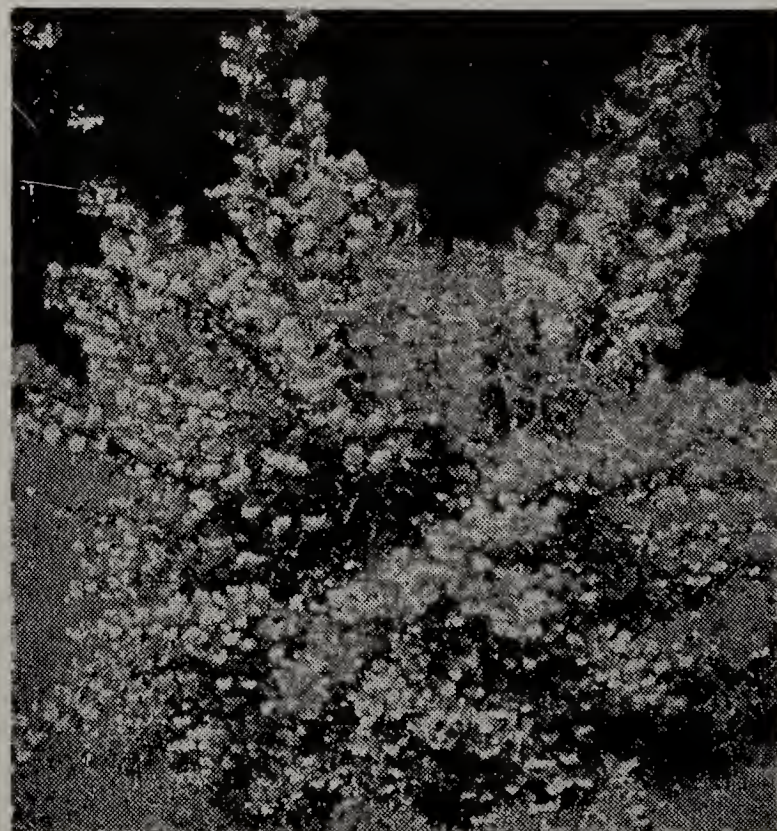

LILAC (Persian Purple)—A thrifty growing bush with slender leaves and deep purple flowers. Flowers a little later than common varieties but flowers last longer and are very fragrant. 18 to 24 in., each, 15c, 3 for 40c, 10 for \$1.10; 2 to 3 ft., each, 25c, 3 for 65c, 10 for \$2.00.

PHILADELPHUS CORONARIUS—The old fashioned Mock Orange or Syringa. Beautiful free flowering shrub with sweet scented white flowers with a creamy tinge. Flowers appear in May and June. 18 to 24 inches, each 20c, 3 for 50c, 10 for \$1.50.

KOLKWITZIA (The new Beauty Bush)—An exceedingly handsome new ornamental shrub which has come to us from the wilderness of China and Central Asia. Foliage and habit attractive even when bush is out of flower; perfectly hardy. It grows 6 to 9 feet high when matured, erect and twiggy, producing long, arching branches covered in spring with clusters of small, tubular flowers of the honeysuckle type, borne in such profusion that the bush is one cloud of delicate pink. Beauty Bush has all the merits of a perfect shrub; hardiness, year around beauty in foliage and habit, and an amazing profusion of flowers of beautiful color. 18 to 24 inches, each 35c, 3 for \$1.00.

PHILADELPHUS VIRGINALIS—Blooms throughout the season. One of the most beautiful new varieties of Mock Orange. A vigorous, tall grower, very large, double-crested flowers with round petals; pure white, sweetly scented clusters of blossoms. 18 to 24 ins., 25c, 3 for 65c, 10 for \$1.75.

AMOR RIVER NORTH PRIVET—Will grow to ten feet in height, but may be pruned to any height and sheared to desired form. Branches are upright; foliage oval or oblong. Can be made very dense by pruning. Rapid grower. Resembles California Privet, but is entirely hardy while California will winterkill badly in the northern states. 18 to 24 in., 25 for \$1.50, 50 for \$2.50, 100 for \$4.00; 2 to 3 ft., 25 for \$1.75, 50 for \$3.00, 100 for \$5.00; 3 to 4 ft., 25 for \$2.25, 50 for \$4.00, 100 for \$7.50.

Deutzia, Pride of Rochester

RHUS COTINUS (Purple Fringe or Smoke Tree)—Conspicuous spreading shrub, growing in tree-like proportions overhung in mid-summer by mist-like clouds of tiny flowers. These billowing panicles of light lavender give the impression of smoke at a distance. One of the most beautiful of all large shrubs. 18 to 24 in., each 40c, 3 for \$1.10.

SPIREA ANTHONY WATERER—A dwarf growing bush covered throughout the summer with large trusses of deep crimson flowers. Leaves bright green, often with variegations of yellow, with incised serrate borders. 9 to 12 inches, each 15c, 3 for 40c, 10 for \$1.00.

SPIREA ARGUTA—One of the showiest of spring shrubs, flowering in early May; dense masses of white flower clusters along drooping branches. Leaves light green, narrow giving lace-like, beautifully soft appearance. 2 to 3 ft., ea., 17c, 3 for 45c, 10 for \$1.25.

SPIREA FROEBELI—A semi-dwarf similar to Anthony Waterer, but taller and leaves reddish green. Bright crimson flowers in dense corymbs during July and August. 18 to 24 ins., each 17c, 3 for 45c, 10 for \$1.25.

SPIREA VAN HOUTTEI (Bridal Wreath)—A leader among shrubs and a beautiful ornament at all seasons. A round and graceful bush with arching branches, covered with white flowers in the spring. No doubt one of the most useful of all shrubs 18 to 24 inches, each 12c, 3 for 33c, 10 for \$1.00, 100 for \$7.00.

SNOWBERRY, RED (Coralberry)—A slender-branched upright shrub with very persistent foliage and purplish-red fruit that hangs on well into winter. Also known as Indian Currant. Flowers small and rose-colored. 2 to 3 ft., each, 15c, 3 for 40c, 10 for \$1.00.

SNOWBERRY, WHITE (Common Snowberry)—Small rose-colored flowers in June and July, followed by large clustered, milk white fruits, which remain far into the winter. The combination of pink flowers and white berries on the same twig is charming. 12 to 18 in., each 10c, 3 for 25c, 10 for 75c; 18 to 24 in., each 15c, 3 for 40c, 10 for \$1.00.

SNOWBALL—Common variety familiar to everyone. Flowers in early spring and us-

Weigela, Eva Rathke

ually can be picked by Decoration Day. Flowers are snow white and ball shaped. 18 to 24 inches, each 25c, 3 for 65c.

TAMARIX AFRICANA—Fine feathery foliage like that of Juniper. Delicate pink flowers, borne profusely on graceful drooping branches. Hardy and will do well in the poorest, dry, sandy soil. 18 to 24 inches, each 20c, 3 for 50c, 10 for \$1.50.

WEIGELA, Rosea—A May to July flowering shrub with stemless bell-shaped flowers set along the stems in clustered profusion. Bright rose shade. 12 to 18 in. each 10c, 3 for 25c, 10 for 75c; 18 to 24 in., each, 15c, 3 for 40c, 10 for \$1.00; 2 to 3 ft., each, 20c, 3 for 55c, 10 for \$1.50.

WEIGELA, Eva Rathke—Large, brilliant crimson flowers completely cover the whole plant during early summer, and continue to bloom on the new growth through the summer and autumn months. One of the newer, very popular Weigelas. 18 to 24 inches, each 25c, 3 for 65c, 10 for \$1.75.

WEIGELA, Variegated—This is perhaps second to no other hardwooded plant with variously colored leaves. It stands the sun well and retains its well marked tints until Autumn. The flowers are a lighter shade of pink than the Rosea, but it is equally as free in bloom. 18 to 24 inches, each 20c, 3 for 55c, 10 for \$1.50.

Hardy Climbing Vines

ALL 2 YEAR NO. 1 STOCK

CLEMATIS, Paniculata (Japanese Clematis)—A Japanese plant possessing unusual merit. Very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy green foliage. Flowers are medium size, pure white, borne in immense sheets and of a most delicious fragrance. Each 25c, 3 for 60c.

HONEYSUCKLE (Hall's Japanese)—A strong, vigorous evergreen variety, with pure white flowers, changing to yellow. Very fragrant; covered with flowers from June to November. Each 22c, 3 for 50c.

WISTERIA (Chinese Purple)—Strong, rapid grower, desirable for trellises, porches, etc. The light purple flowers are very showy and are produced in long racemes. Perfectly hardy. Each 25c, 3 for 60c.

Field Grown Hardy Perennials

Our list offers Perennials that are best adapted to transplanting and will give you flowers all summer long. Strong two-year old field grown plants ready to bloom the first year. Our soil is especially adapted to growing of Perennials with a heavy, fibrous root system.

Columbine

glittering display of highly colored, large, long spurred flowers that are absolutely unequalled. Plants grow two feet high. Flowers come in mixture of blues, whites, yellows, and shades of pink and rose. **Each 10c; 3 for 35c; 10 for 75c.**

GAILLARDIA (Blanket Flower)—Grows about two feet high and flowers from June to frost. Flowers of gorgeous coloring. The center is dark red brown, while the petals are marked with rings of brilliant crimson, orange, and vermillion, the combination all in one flower. **Each 12c; 3 for 30c; 10 for 90c.**

GYPSOPHILA (Baby's Breath)—One of the favorite hardy perennials. Flowers are white, small but produced in great abundance. July to September. **Each 10c; 3 for 25c; 10 for 75c.**

DIGITALIS (Foxglove)—For stately and picturesque beauty it is not to be surpassed. Various shades, purple to white. Tubular blossoms with spotted throat. **Each 15c; 3 for 35c; 10 for \$1.00.**

HIBISCUS (Giant Flowering Mallow)—An improved form of the Native Rose Mallow. The

Gaillardia

most beautiful and hardy of all herbaceous plants. Blooms freely from early July to late September, with striking flowers 6 to 8 inches across. Does well in any location. We offer a mixture of Red, White, Pink, and White with red throat. **Each 10c, 3 for 25c, 10 for 75c.**

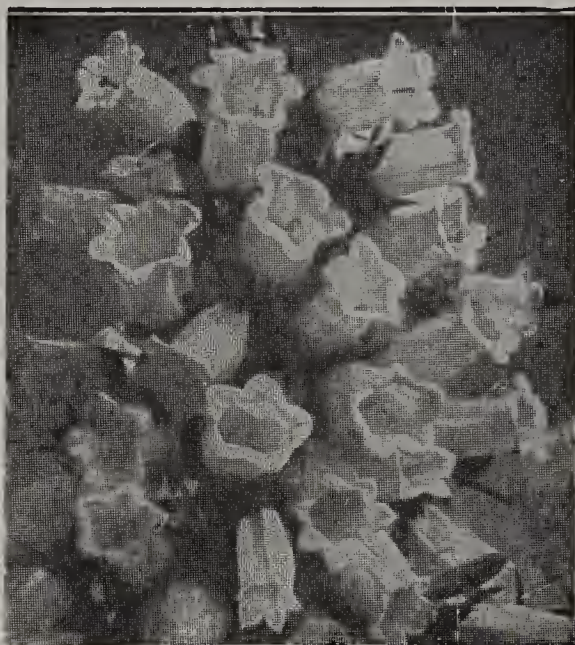

Received your shipment of Strawberry plants in fine condition, and find they are extra fine long rooted plants. Am very much pleased with them. 4-23-32. Arthur C. Cook, Peoria, Ill.

Received plants and they were just fine—the best we ever had—and your prices are low. 5-2-32. Joseph Weidner, Spartansburg, Pa.

ALYSSUM (Dwarf Goldentuft, Madwort)—Broad masses of bright yellow flowers in early spring. An excellent plant for the rockery or front of borders. Of easiest culture and very free blooming. **Each 10c; 3 for 25c; 10 for 75c.**

CANTERBURY BELLS (Campanula)—One of the finest Campanulas, with large bell-shaped flowers, blue, pink, white, rose, and mixed colors. Bright and attractive. **Each 20c, 3 for 50c, 10 for \$1.50.**

COLUMBINE (Aquilegia)—Columbines are always beautiful, but in our long spurred Hybrids you have a

Canterbury Bells

SHASTA DAISY—Free flowering plant with large, showy daisy-like white flowers with gold centers. 3 to 4 inches across. Blooms profusely throughout the summer and autumn. **Each 12c; 3 for 30c; 10 for 90c.**

SWEET WILLIAM—The well-known hardy Sweet William in many colors, blossoming throughout June and July. Flowers are very fragrant. We offer a mixture with wide range of colors. **Each, 12c; 3 for 30c; 10 for 90c.**

TRITOMA (Red Hot Poker)—Vies with the Canna for attractiveness and brilliancy. One of the most striking groups of plants in cultivation, with their pyramidal spikes of blazing red, tubular flowers, shading to salmon-rose at edge, and having long protruding anthers. Of easy culture. **Each 15c, 3 for 35c, 10 for \$1.00.**

Eight years ago I bought 8,000 strawberry plants. They were satisfactory. A. B. Evans, Gallatin, Mo.

Shasta Daisy

Select Beautiful Roses

ALL STRONG 2-YEAR FIELD GROWN BUSHES

HYBRID TEA ROSES

Price: Each 35c; 3 for \$1.00; 5 for \$1.50.

LOS ANGELES—Growth vigorous, producing in continued succession during growing season, strong shoots, each one bearing an enormous flower of a luminous flame pink, toned with coral and shaded with translucent gold at the base of the petals. Very fragrant. Buds handsome, long and pointed while the beauty of form and ever increasing wealth of color is maintained until the last petal falls.

MADAME CAROLINE TESTOUT—Extra large, fragrant blooms of brilliant pink with darker center. Edges of petals tinged with soft carmine pink. Very free blooming, and hardy.

MRS. AARON WARD—One of the few hardy yellow, monthly roses. Small, dainty flowers of Indian yellow, edge of petals being tinged with creamy-yellow and pink. Foliage bronze green. Plant is small, but strong and thrifty in growth.

RED RADIANCE—Flowers are large, globular, of an even shade of clear red, without trace of any other color, retaining its vividness for an unusually long time after being cut. A remarkable bloomer, being constantly in flower from early spring until freezing weather.

SOUV. DE CLAUDIUS PERNET—Strong growing bush, magnificent foliage. Looks as if varnished. Perfectly formed flowers. Absolutely new in color—deep lemon-yellow without spot or blemish. Wonderfully free blooming.

HARDY CLIMBING ROSES

CRIMSON RAMBLER—Great masses of crimson, semi-double flowers are borne by these vigorous plants. Desirable pillar and porch plant. Each 25c, 3 for 65c.

DOROTHY PERKINS—One of the most notable climbing Roses. Clear cherry-pink, slightly fragrant; borne in great profusion and lasts a long time. Each 20c, 3 for 50c.

Paul Neyron

EXCELSA (Red Dorothy Perkins)—An intense crimson, with the edges of the petals a little lighter, produced in immense clusters. Foliage glossy. Each 25c, 3 for 65c.

PAUL'S SCARLET CLIMBER—A new rose of brilliant, vivid scarlet maintained without burning or bleaching until the petals fall. Semi-double flowers of medium size completely cover the vine. A most important addition to climbing roses. Each 30c, 3 for 75c.

WHITE DOROTHY PERKINS—Closely resembles Dorothy Perkins, except for its immense clusters of pure white flowers. The most valuable white climber of its class. Each 25c, 3 for 65c.

HARDY PERPETUAL OR JUNE ROSES

Price: Ea., 35c, 3 for \$1.00.

FRAU KARL DRUSCHKI (White American Beauty)—Really an ever-blooming variety, bearing a heavy crop of blossoms in June and from then, every month, until frost. The long pointed, egg-shaped buds open loosely into blossoms of pure white, with just a suggestion of pink, sometimes measuring 6 inches across.

PAUL NEYRON (Peony Rose)—The largest rose of all. Blossoms of clear pink shading to rose. Flowers are well-shaped, double and very fragrant. Plant is erect in habit and a strong, heavy grower, blooming repeatedly during the season.

ULRICH BRUNNER—A bright cherry-red rose of striking beauty. The flowers are unusually large. Hardy and vigorous. Almost continuously in bloom from early summer until autumn.

Mrs. Aaron Ward

SPECIAL ROSE BARGAIN

10 Dorothy Perkins Climbing Roses, heavy 2 yr. bushes for \$1.00, Net, not prepaid.

CHOICE DAHLIAS

Our Dahlia orders are filled with good thrifty divisions of field-grown clumps. We guarantee them true to name and free from disease. We are growing all the Dahlias we offer in this list. It will pay you in the purchase of Dahlias to buy direct from a grower who can supply his own stock as this lessens the chance of mistakes.

The stock we got from you two years ago was fine and we want some more. J. H. Hale Peach had 91 and Rochester 86 peaches first year planted. 4-13-32. Mrs. C. A. Adams, Clarion, Pa.

A REAL DAHLIA BARGAIN

An assortment of Dahlias comprising a wonderful range of color and types. These tubers are not labeled by name, but are named varieties and you are sure of getting a fine assortment. Price, 3 for 40c; 6 for 70c; 12 for \$1.25, postpaid.

Rokely's Select Gladioli

Gladioli do their very best in a rich, sandy loam, but they will thrive in any soil except a very stiff clay. Bulbs should be planted during April and May depending on soil and climate. In planting, the rule is to plant each bulb at least three times the depth of its diameter, with the pointed side of the bulb up. We grow our own Gladioli Bulbs and your order will be filled with plump, healthy stock.

PRICES GIVEN HERE ARE POSTPAID—50 bulbs at the 100 rate; 6 at the dozen rate. However, only one variety can be used to secure dozen or 100 rate. We are offering two sizes in our Gladioli. The first size, or large bulbs, indicated by letter L, in the descriptions are all 1 1/4 inches and up in diameter. The second size, or medium bulbs, indicated by letter M, are all 3-4 inches and up in diameter. This latter size will throw satisfactory flower spikes the same summer they are planted and will grow into large bulbs for the next season.

ALICE TIPLADY—Grand, large Primulinus of beautiful orange saffron. L, each, 5c; doz., 40c; 100, \$2.00; M, doz., 25c; 100, \$1.25.

AMERICA—Soft lavender pink. Large flowers. Long spikes. L, each 5c; doz., 40c; 100, \$2.00; M, doz., 30c; 100, \$1.50.

ANNA EBERIUS—Dark velvety purple, throat deeper. Fine. L, each 5c; doz., 40c; 100, \$2.00; M, doz., 30c; 100, \$1.50.

Souvenir

W. H. Phipps

BARON J. HULOT—Rich velvety purple-blue. Tall spikes. Extra fine. L, each 5c; doz., 40c; 100, \$2.00; M, doz., 30c; 100, \$1.50.

W. H. PHIPPS—A real wonder glad. Light rose salmon. Long spike with often 15-20 blooms open at a time. L, each 8c; doz., 60c; 100, \$3.00.

VIOLET GLORY—Rich self color deep violet. Deeper throat. L, each 5c; doz., 40c; 100, \$2.00. M, doz., 30c; 100, \$1.50.

GLADIOLI IN MIXTURE

ROKELY'S RAINBOW MIXTURE—This is a special garden collection made up of dozens of the very best varieties mixed. When in full bloom they furnish a veritable riot of colors that will thrill any true flower lover. We are sure you will find our mixture far ahead of most mixtures offered in that it contains no worthless seedlings or old discarded varieties. Price postpaid, L, 30c per doz., \$1.50 per 100. M, 20c per doz., \$1.00 per 100.

Mrs. F. Pendleton

We have had extra good luck with the trees bought of you last year, also the plants and vines. Are very glad to recommend your nursery stock here. 3-26-32. Byron F. Huffman, Ottumwa, Ia.

Peace

GLADIOLI BULBLETS

For those wishing to grow their own bulbs we offer bulblets from our Rainbow Mixture. Under favorable conditions many of these bulblets will throw a flower spike the same summer as planted. They will grow into large bulbs in two summers. We furnish full instructions for planting with each order but give no warranty as to germination. Price, postpaid, 300 Bulblets for 25c; 1500 bulblets for \$1.00.

GIANT DARWIN TULIPS

We will have a nice clean lot of Darwin Tulips in Mixed colors ready for shipment at planting time this coming fall. These are all large No. 1 bulbs and we are pricing them very low, quality considered. Include with your order for other stock this spring or send in for them when you are ready to plant. Price: 40c per doz.; \$2.00 per 100, Postpaid.

CUSTOMERS, ATTENTION

SHIPPING SEASON—We begin shipping the last of March or first of April, according to season, and continue until about May 15th. We do not advise our customers to order stock shipped after this date. WE MAKE SHIPMENT OF STRAWBERRY PLANTS IN THE SPRING ONLY. Please do not order for late summer or fall shipment as we cannot furnish at that time.

TIME TO ORDER—Early. Make up your order and send to us as soon as you receive this catalog. Your stock will then be delivered when you are ready to plant.

TERMS—Cash with order. However, if you prefer, you may send a small down payment with your order and the balance any time before you wish shipment made. Orders amounting to \$5.00 or more will be shipped C. O. D. providing 25 per cent of the amount is remitted with order.

REMIT BY—Personal Check, Express or Postoffice Money Order, Bank Draft, or Registered Letter. Never send currency in letter without registering as we can assume no liability for currency lost in unregistered letters.

REFERENCES—State Savings Bank, Bridgman, Michigan; the Postmaster, Express Agent, or any business house in Bridgman.

METHODS OF SHIPPING—For most orders express is the safest and, all things considered the best way to have your plants shipped. All express orders are shipped charges collect. Many of our small orders are now shipped by Parcel Post and arrive in good shape. We do not recommend it for any but very small orders, however, as it is very expensive on large shipments.

Inquire from your Postmaster or Rural Carrier what zone you are in from Bridgman, Michigan. By referring to the following table you may then determine the amount of postage you must add to your order if you wish Parcel Post shipment.

For each \$1.00 worth of stock in your order, add for postage:

1st and 2nd zone	3rd	4th	5th	6th	7th	8th
\$0.10	\$0.15	\$0.20	\$0.25	\$0.30	\$0.35	\$0.40

Plants do not all weigh the same when packed for shipment and no table could prove absolutely correct. Always make a liberal allowance for postage FOR WE WILL RETURN TO YOU EVERY CENT NOT USED. If you prefer, we will ship your order by mail C. O. D. for exact postage required, and in all cases where no postage allowance is made we do ship C. O. D. for postage charges.

BERRY PLANTS
Price List for 1933

F. O. B. BRIDGMAN, MICHIGAN

We are sure you will find our prices as low as any other firm selling the same high grade stock, and in nine out of ten cases they are lower. We will always meet any competitive prices for the same quality stock, but will not ship out poor stock in order to meet the competition of some firms who have nothing to recommend their stock except low price.

NOTE: You may select 500 or more plants of one variety at the thousand rate. Amounts between 100 and 200 of one variety at the 100 rate, between 200 and 300 of one variety at the 200 rate, etc. We do not fill orders for less than 25 plants of one variety of Strawberry, Raspberry, Blackberry, and Asparagus plants. All other stock listed in this catalog will be furnished in any quantities from one up.

All stock not listed on this page is priced where described. Customers pay transportation charges on all stock in this catalog except GLADIOLI and DAHLIA BULBS on which prices quoted are postpaid.

BLAKEMORE

Because of its firm flesh and tough skin the Blakemore has proven a good long distance shipper and will remain on the vines a considerable time after ripe without loss from over-ripeness or rotting. See page 3 for further description.

BEAVER

Leading growers are setting large acreage to Beaver, as its ability to stand up under extreme conditions, rich color, size and attractive appearance command the highest prices.

We recommend this berry highly to commercial growers especially where soil is poor or late frosts usually injure blossoms. See page 3 for further description. All strawberries priced on page 23.
